Our Identity
The International Hellenic University (IHU) is Greece’s first state University where programmes are taught exclusively in English.

With backing from the Greek State and the regional business community, the IHU aims to become one of Europe’s key research institutions attracting leading academics and outstanding students from South East Europe (SEE) and across the world.

Our Strategic Mission
- Provide research and education that meet the needs of the international community.
- Enhance understanding of the economic, socio-political and technological issues facing the region through teaching and research of the highest academic standard.
- Create an internationally diverse student and faculty community inspiring greater intercultural understanding.

Our Facilities
The International Hellenic University campus is specifically developed to facilitate modern learning techniques and is equipped with the latest information technology, a sophisticated e-Learning platform, as well as an excellent learning resource centre providing a comprehensive, up-to-date selection of books and journals, access to top international on-line databases and other resources, and an attractive study area.

The campus is located conveniently close to Thessaloniki’s Makedonia International Airport. Access to the city centre is easy.

Thessaloniki
Thessaloniki is a lively, modern city, bustling with life and movement, with a mild climate and its own distinctive intellectual and artistic personality. Named after the sister of Alexander the Great, Thessaloniki was founded in 315 BC and since then it enjoys an uninterrupted history. It has been the historic meeting point of different cultures, creating a truly cosmopolitan Greek city in SE Europe.

With a population of more than one million people, a busy commercial port and the biggest University student population in Greece Thessaloniki is a truly vibrant metropolis, playing an important economic and cultural role within the Balkan, European and wider international community.

Professor of Commodity Economics and Finance
Cass Business School
City University London

Georgia Vlachou
Professor of Accounting
University of Economics and Business

Ioannis Vlahavas
Professor of Computer Science
Aristotle University of Thessaloniki
1. The Core Modules
During the first term all MSc in ICT Systems students follow four (4) mandatory core modules that provide them with a grounding in key functional areas of the ICT sector.
These core modules sum up to a total of 30 ECTS units:
- IT Management and E-Business Strategy
- Advanced Database Management Systems
- Web Information Systems
- Computer Networks
During the second term, all students are also required to attend three (3) required modules for a total of 18 ECTS:
- Decision Support Systems
- Information Systems Security
- Wireless Communications and Networks

2. The Elective Modules
During the second term students take the programme further to their own needs by choosing elective modules from a broad range of options. Each student may choose three (3) elective modules from those offered by the programme and two additional elective modules from post graduate courses common to the three Schools of the University.
The elective modules chosen by students during the second term must give a total of 12 ECTS.
Some of the elective courses may not be offered in a particular year, depending entirely on student demand.

3. The Master’s Dissertation
In the third term, students choose a dissertation topic relevant to the courses of the MSc programme. The topic is chosen by the student with input and advice from a faculty member who acts as the supervisor, working closely with the student. The dissertation should be a piece of original scientific work. Upon completion, it is submitted for examination and approval by a three-member committee chaired by the student's supervisor. Students can submit their research proposal or select one of the topics proposed by the faculty.

4. The Timetable
The MSc in ICT Systems (full-time) is a 14-month programme taught over three terms. The first two terms involve taught courses while the third term is devoted to the Master's dissertation. The programme is also available over two full-time years, for those who cannot commit to full-time studies. In order to be awarded the MSc degree, students must complete a total of 90 credits.

Admissions
While admission to the IHU is competitive, our admissions policy vigorously supports equality of opportunity. We are focused on building a student community which includes men and women from different backgrounds, abilities, with input and advice from a faculty member who acts as the supervisor, working closely with the student. The dissertation should be a piece of original scientific work. Upon completion, it is submitted for examination and approval by a three-member committee chaired by the student's supervisor. Students can submit their research proposal or select one of the topics proposed by the faculty.

When to Apply
The IHU operates on a rolling admissions basis. This means that candidates apply for and are admitted to our programmes all year round. We suggest, however, that you apply as early as possible to ensure quick responses and place availability. We aim to provide decisions within ten working days of receiving your completed application. Successfully completing all parts of the application form fully and submitting all your supporting documentation is an excellent way to make an informed decision. You are advised to consult the School application forms available on our website or ask for help on your application and the admission process.

Entry Requirements
For your application to the MSc in ICT Systems programme to be considered you need:
- a good university degree from a recognised university in an ICT-related field with a strong ICT background
- a good IELTS or TOEFL score or Cambridge Certificate for graduates from non-English-speaking universities
- two academic references (both referees should have direct knowledge of your academic achievements)
- two academic references (both referees should have direct knowledge of your academic achievements)

Scholarships
The International Hellenic University offers a number of scholarships for the postgraduate programme, covering a significant portion of the programme fees. Scholarships are awarded on the basis of academic merit and are given to top students of proven academic record.

Career Office
The IHU’s Career Office is committed to providing professional guidance, resources and opportunities to students to help them enhance their interests and education and to build up a network of professional contacts. The Career Office has conducted training for students and has adopted a student-centred philosophy according to which each student gets individual attention and support in every career concern. Students are encouraged to be involved in their own career development during their studies. Career office offers a wide range of services to inform students about study and career possibilities in the ICT sector and in the broader area of Information, career fairs, internships, and industries and universities are only some of the suggestions for ways to improve their employability and to make informed decisions about their career choices.

Alumni Network
As an alumnus of the IHU, you are invited to take part in an active network that helps you to stay in touch with each other and feel part of the IHU family after your graduation. Stay in touch with the IHU and be a part of an active network that helps you to stay in touch with each other and feel part of the IHU family after your graduation. The IHU’s Alumni Office is committed to providing a range of services to alumni and former students, including: Free IHU webmail for life, lifelong support in career issues, national and international networking opportunities, access to online services, access to library resources, participation in various events and activities, career fairs, reunions, social gatherings and conferences, and generally staying in touch with each other, the School and the University.
